Who we are

The Transportation Association of Canada (TAC) is Canada's centre of technical expertise for roads, highways and urban transportation.

We are a neutral forum where member organizations and their staff share ideas and exchange information on technical transportation issues. TAC helps its members build knowledge and pool resources to tackle transportation challenges that are important to them.

TAC doesn't set standards, but develops technical guidance for transportation infrastructure, systems and services falling under six focus areas:

ENVIRONMENT &
CLIMATE CHANGE

INFRASTRUCTURE &
ASSET MANAGEMENT

MOBILITY

SAFETY, DESIGN
& OPERATIONS

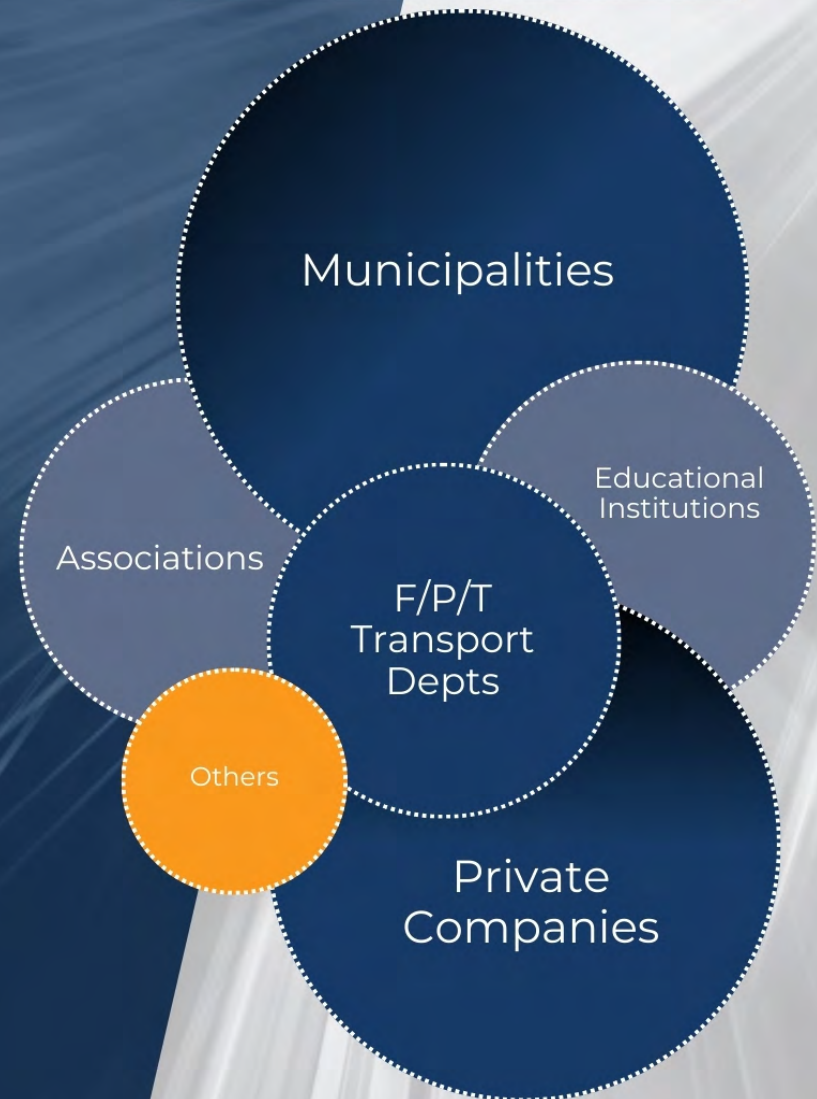

TECHNOLOGY

WORKFORCE
DEVELOPMENT

BUILDING A SUSTAINABLE TRANSPORTATION LEGACY

More than 1,400 decision-makers, leaders and practitioners with interests in roads, highways and urban transportation from across all sectors gather at the 2025 TAC Conference & Exhibition in Québec City, October 5-8.

Creating more resilient transportation systems requires both foresight and wisdom. 2025 TACConf will explore the questions we must ask today to ensure we have the right answers tomorrow.

The conference is built on the foundation of a broad, three-day technical program that features over 100 technical sessions across each of TAC's six focus areas.

TOPICS FOR 2025 INCLUDE:

- ACTIVE TRANSPORTATION, COMPLETE STREETS, AND MOBILITY
- ASSET PERFORMANCE AND MANAGEMENT
- CONNECTED VEHICLES AND NETWORKS
- CONSTRUCTION, UTILITY COORDINATION, AND MAINTENANCE AND OPERATIONS
- DATA MANAGEMENT AND MODELLING, AND DIGITAL TWINNING
- ENVIRONMENT, CLIMATE CHANGE, RESILIENCE, AND DECARBONIZATION
- HEALTH AND EQUITY IN TRANSPORTATION
- HIGHWAYS, INTERSECTIONS, AND ROUNDABOUTS
- PAVEMENT ENGINEERING
- ROAD SAFETY, SAFE SYSTEM, AND VISION ZERO
- TRANSPORTATION PLANNING AND FINANCE
- TRANSPORTATION STRUCTURES

Be part of TAC and
#TACConf to show
your peers how you
and your organization
are leading and
innovating to solve
transportation
challenges
of today and
tomorrow!
